

COURSES FOR THE PILOT GROUP IN ITALY

From 25th to 28th of September 2017, there was a training in Guglionesi (CB), at the Municipal Library, where more than 20 people were involved (unemployed and precarious workers).

Before the beginning of the activities, a teacher training was carried out through audio-conferences sessions and a day-to-day feedback was provided during the training.

The training course that has allowed to test the materials developed for the project has been divided into 4 days. The courses were held by Dr. Franco Ricciuti as an experienced lecturer, Commercialist and business creation expert. The training focused mainly on Chapter A (Who am I, What do I want), Chapter B (What can I do), and Chapter D (Competences of entrepreneurship and creativity).

The self-diagnosis of their skills and aspirations and the CV creation, the preparation of presentation letters and of the job interview were the most popular parts of the program. Creativity and selection of entrepreneurial ideas were also popular.

The course was held thanks to the collaboration of the Municipality of Guglionesi, the Union of Municipalities of Basso Biferno and the Association of Social Promotion InFormare.

The course received a very high degree of appreciation from the students. The kit was validated by the students who judged it very positively and made only slight suggestions to make it even clearer in some parts, and also by than to a committee made up by two representatives of the InFormare association, the teacher and the project manager for the Consorzio Lavoro e Ambiente that have validated the Italian final version by personalizing it slightly.
